Contact	Hall Contracting for further information
Scope	Dredging of approximately 3 million m3
Contract amount	Confidential
Start date	April 2015
Completion date	Expected October 2015 finish

Project Profile

Sand Dredging for Forest City Development

Covering a total of 3,425 acres, the 4 man-made island Forest City project will be reclaimed in four phases: Island 1, 979 acres; Island 2, 1896 acres; Island 3, 405 acres; and Island 4, 145 acres. The \$150 billion project is being developed in a joint venture by Chinese developer Country Garden and a Malaysian company.

Hall Contracting has been engaged by the contracted builder JBB to undertake the dredging component of Phase 1. This will involve the dredging of approximately 3 million m3 of sand which is being brought to the dredge site by sand carrier barges. Hall Contracting is using its largest cutter suction dredge the 'Eastern Aurora' along with 'Groote Eylant' work boat in order to pump the material a distance of between 2100m and 2600m. A combination of Hall Contracting staff and locally sourced labour and sub-contractors are being used to deliver the works.
