

HALL

Civil Construction

State-of-the-art. Modern. Advanced.

We own and operate our own equipment, which sets us apart from many of our competitors.

Having been a key player in the Queensland and Australian civil construction industry for more than 30 years, Hall Contracting has successfully established itself as a leader within a competitive industry where safety, experience and credibility are crucial.

From bulk earthworks to the construction of infrastructure such as roads, stormwater drains and sewers, our skilled team possesses the experience and capabilities to successfully manage a wide variety of civil construction projects. We own and operate our own equipment, which sets us apart from many of our competitors.

Renowned for our attention to detail and commitment to meeting and exceeding client expectations, we have developed a reputation for offering unparalleled service delivery.

Tools of the trade

Owning and operating a diverse fleet of plant and construction equipment, we have the tools and provisions on hand to deliver projects on time and on budget, every time. Our equipment is fitted with the latest GPS control technology and we have the capabilities to undertake complex and environmentally sensitive civil construction projects.

Our range of plant includes:

- excavators
- dozers
- scrapers
- backhoes
- articulated dump trucks
- graders
- compactors and rollers
- loaders.

Our capabilities

Armed with the necessary skills, experience and tools, Hall Contracting has consistently been awarded contracts to deliver the following:

- Bulk earthworks
- Civil infrastructure
- Gas and water pipelines
- Golf courses and sporting fields
- Canals, lakes and weirs
- Environmental projects

Infrastructure

From major trunk roads, golf courses and sporting fields, right through to bridges, culverts, weirs and lake edge protection, Hall Contracting possesses a proven track record in delivering successful civil infrastructure projects.

Project portfolio

- **NICKLIN WAY BRIDGE**
Construction of a northbound and southbound bridge and pedestrian underpass, and major road upgrade of Nicklin Way to six lanes.

- NEWPORT LOCK & WIER
Construction of a concrete lock and weir, including an elevated pedestrian bridge.
- CONDABRI WATER TREATMENT PLANT, MILES
construction of high-density polyethylene (HDPE) pipelines for Origin Energy's coal seam gas projects.
- LOCH LAMEROUGH SALINITY PIPELINE AND INTAKE JETTY, GOLDEN BEACH
laying a pipeline through an existing urban area, incorporating an automatic pumping station.
- PELICAN WATERS BOULEVARD BRIDGES, SUNSHINE COAST
construction of a four-span overwater bridge using a combination of dry and overwater construction.

Urban development

Experienced in bulk earthworks, installing subdivisional infrastructure and developing canal estates, Hall Contracting is an industry leader in urban development.

Project portfolio

- AURA
Construction of all civil works for a major Sunshine Coast residential project. Aura will eventually house around 30,000 people.

- BIRTINYA TOWN CENTRE
Delivery of all bulk earthworks in the western retail precinct of the Oceanside Town Centre. This project included the completion of roadworks, a trunk poly gravity sewer and sewerage pump station, drainage works and traffic signals.
- BOKARINA BEACH
Delivery bulk earthworks including revetment walls, sewer, major drainage works and substantial dewatering. Key achievements include delivery of: salinity pump station, jetty and rising main, and construction of the lake.
- PELICAN WATERS ESTATE, SUNSHINE COAST
undertaking major earthworks and civil infrastructure construction for a Greg Norman-designed golf course and major residential canal estate of over 2,500 lots.
- BRIGHTWATER ESTATE, SUNSHINE COAST
undertaking major earthworks and installation of civil infrastructure for 1,500 residential lots at Stockland's centrepiece residential development.
- PARKLAKES SPORT FIELDS AND LAKES, BLI BLI
construction of sports fields, lakes, walkways and jetties.

Environmental projects

In recent years, Hall Contracting has delivered a number of ecologically sensitive projects including the translocation of rare and endangered native flora and the management of acid sulphate soils. The successful completion of these projects has earned us a solid reputation for providing innovative and practical solutions.

Project portfolio

- PELICAN WATERS ESTATE, SUNSHINE COAST
implementing an innovative approach to construction adjacent to an environmentally sensitive fish habitat. This environmentally sound action plan earned the project the 2005 National Case Earth Award.
- BUNDILLA LAKES VEGETATION TRANSLOCATION, SUNSHINE COAST
successfully translocating 13 hectares of rare and endangered flora using special equipment custom-designed in-house.
- BRIGHTWATER ESTATE, SUNSHINE COAST
implementing environmental controls including a complex sediment and erosion control system.

The Hall way

At Hall Contracting, we pride ourselves on our ability to deliver practical solutions to problems, and have proven expertise in overcoming unique challenges posed by complex projects. Most importantly, we value our client relationships and work hard to deliver our service in a cooperative manner.

Our frameworks for safety, sustainability and quality assurance are essential to our success.

Safety

Every person who works with Hall Contracting is considered a part of the extended family.

The ability of our people to come to work and return safely and injury-free is our first priority. We operate a safety management system to AS 4801 and OHSAS 18001 (accredited by NCS International) to help us achieve our goal of zero harm, and we continually strive to improve our safety procedures.

Environment

Hall Contracting is renowned for its environmentally-conscious approach to projects, with our commitment to environmentally responsible contracting at the forefront of everything we do.

As a contractor, we make every effort to carry out development projects in a responsible manner, marking environmental considerations as a top priority. We are proud to operate an Environmental Management System that is accredited to ISO 14001.

Awards

Our ability to successfully manage environmentally sensitive projects has resulted in the receipt of the following accolades:

- 2005 National Winner — Civil Contractors Federation (CCF) Earth Award for acid sulphate soils management at Pelican Waters;

- 2009 Queensland State Finalist — CCF Earth Award for Brightwater Estate rare species translocation;
- 2012 Queensland State Finalist — CCF Earth Award for Brightwater Estate; and
- 2013 Finalist — Healthy Waterways Award for Brightwater Lake.

Quality

Quality is more than just delivering an outstanding project; it's a way of life.

With quality one of Hall Contracting's core values, our team endeavours to incorporate quality controls into all facets of business.

We operate a Quality Management System to ISO 9001, which is accredited by NCS International, and our corporate culture embodies a strong belief in providing only first-rate service.

Our belief statement

We believe successful projects are built on trusted, independent and credible expertise. We achieve this through a collaborative and practical approach based on common values, honest communication and informed decisions that result in a sense of shared pride in everything we do.

Our resourceful solutions are delivered through state-of-the-art equipment, efficient systems and outstanding people to provide every client with a world-class experience.

We believe in supporting the environment, respect for the community and building a sustainable future.
